

Insight 1: The day of the week with the greatest number of cancelled flights.

Links

<https://public.tableau.com/app/profile/chukwudalu.nwazojie/viz/Dayoftheweekwiththemostrumberofcancelledflights/Sheet4?publish=yes>

Summary

The bar chart above shows the days of the week with the total number of flights cancellation associated with each day of the week. It also shows details about the reasons for the cancellation with Monday having the highest number of cancellations 630 flights cancelled because of weather, 191 flights because of National Air System and 217 flights because of airline.

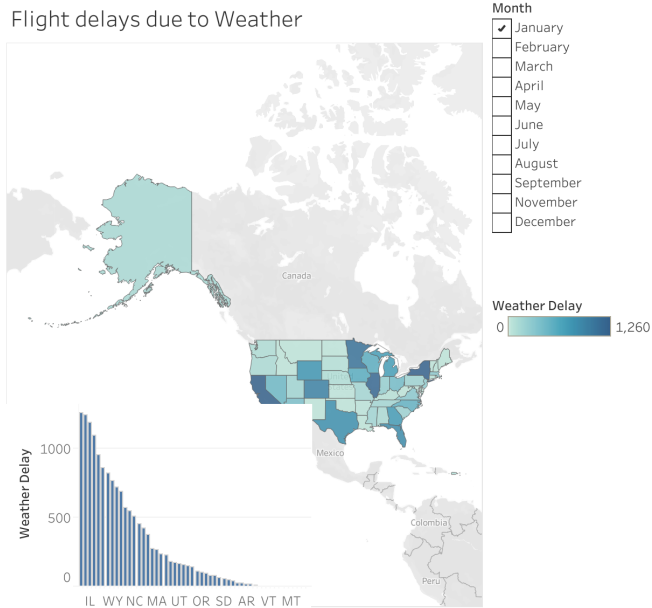

Design

Used a bar chart because it is easier to see the comparison using the length of the bars and the different reasons for cancellation can be seen in detail.

Insight 2: Which State had the most flight delays due to weather in the month of January?

Link

<https://public.tableau.com/app/profile/chukwudalu.nwazojie/viz/FlightsdelayduetoWeatherinthemonthofJanuary/Dashboard2?publish=yes>

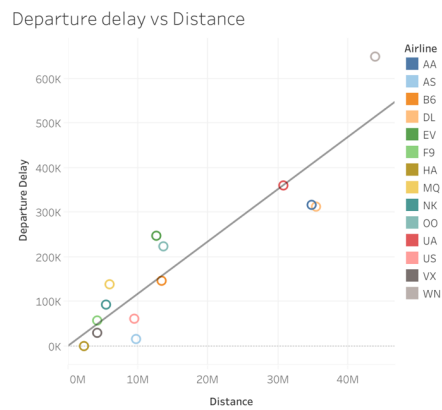

Summary

The dashboard shows the sum of weather delays for each state and was filtered for the month of January, California (CA) shows the greatest number of delayed flights with 1,260 flights delayed followed by New York (NY) with 1,245 delayed number of flights.

Design

The dashboard was used to display two charts, where the bar charts show the values depending on the length of the bars and the globe depicts the most values depending on colour intensity.

Insight 3: The relationship between the distance travelled and departure delays by the airlines

Link

<https://public.tableau.com/app/profile/chukwudalu.nwazojie/viz/DeparturedelayvsDistance/DeparturedelayvsDistance?publish=yes>

Summary

The plot shows a strong, positive relationship with a correlation coefficient value of 0.83 between the distance travelled and the departure delays. The departure delays increased as the distance increased for the different airlines.

Design

The scatter plot was used to help determine the relationship between the travel distance by the airlines and the departure delays.
